Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
 - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
 - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Claims 6-21 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 5 August 2004. In a further phone conversation with Mr. Sanford Astor (Reg. No. 20,748) on 15 September 2004 it was determined that figures 1-2 contained two species in the form of two options of a grip spiraled wrapped (Claim 2) and a tubular grip (Claim 3). Mr. Astor elected the species of the grip being a tubular grip (Claim 3). As such claims 3 and 6-21 have been withdrawn from further consideration.

Specification

2. The disclosure is objected to because of the following informalities:
- a. On page 3 lines 17 it states that figure 11 is a cross-section view taken on lines 11-11 of figure 10. Figure 11 does not look like it should as shown for the line 11-11 in figure 10.
 - b. On page 3 lines 21 it states that figure 14 is a cross-section view taken on lines 14-14 of figure 13. Figure 14 does not look like it should as shown for the line 14-14 in figure 13.

Appropriate correction is required.

Drawings

3. The drawings are objected to because of the errors as stated in the paragraph above for figures 11 and 14. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1, 3, and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Huang (5,355,552) in view of Squadroni and Official Notice.

Huang discloses a handle in the form of a solid core (201, Figs. 22-26), a grip (205) attached to a handle (Figs. 22-26), a bladder (207) being air tight between a grip (205) and a handle (201), inflating the bladder to the desired size (Col. 6, Lns. 16-22), and a finger pump (209).

Huang lacks an air tight grip, a grip being tubular, and solid piece of material placed over a handle and sealed to a handle at a top and bottom of a grip. Squadroni discloses a grip (Fig. 2) with a portion of it being an inflated elastic (Claim 3) tube (Ref. No. 15, Figs. 1, 8-9) being air tight and surrounding a core (12). In view of the patent of Squadroni it would have been obvious to modify the implement of Huang to have an air tight grip, a grip being tubular, a grip being a solid piece of material placed over a handle and sealed to a handle at a top and bottom of a grip in order to simplify a grip by having fewer parts as not having an outer layer and a bladder.

6. Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Huang (5,355,552) in view of Squadroni as applied to claims 1, 3, and 5 above, and further in view of Official Notice.

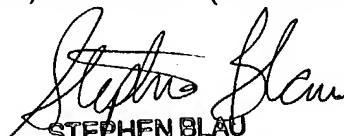

Huang lacks a grip being formed of rubber.

Squadroni discloses a grip (Fig. 2) with a portion of it being an inflated elastic material (Claim 3). The examiner makes Official Notice that a well known inflatable elastic material known is rubber. In view of the patent of Squadroni and the examiner's Official Notice, that it would have been obvious to modify the inflatable tubular grip of Huang to be made of rubber in order to utilize an inflatable elastic material used in the market place.
